

Portable Metal Detector

SNOOPER-TP

The invisible Shield for Public Safety

Detects metallic objects passing between two sensors.

FEATURES

Detects weapons. Without gates. Without suspicion.

Stealth technology ensures threat detection without creating discomfort or visible inspection zones.

Installs in 5 minutes – anywhere, anytime.

Compact and intuitive design allows rapid setup in both indoor and outdoor environments.

Completely portable. Truly stealth.

Lightweight and easy to move, the system blends into any environment without drawing attention.

Stay hidden. Stay protected.

SNOOPER TP silently monitors passageways up to 1.5 meters while keeping spaces open.

Ideal for schools, hospitals, and public events.

Designed for locations where traditional metal detectors are impractical or intrusive.

SNOOPER-TP

- SNOOPER-TP is a next-generation **portable metal detector**, ready for deployment anywhere in under **five minutes**.
- Equipped with dual precision **small magnetic sensors**, SNOOPER-TP identifies the size of ferrous objects and presents instant feedback via its onboard screen.
